

CAMD Case Studies – **Emerging Technologies** - 2015

## Dinosaur Discovery - Phone and Tablet App

[Western Australian Museum](#)

The [Dinosaur Discovery augmented reality app](#) allows visitors to see 3D renders and animations of dinosaurs in various contexts, such as on exhibition catalogues so they can see dinosaurs they are reading about, on exhibition panels, or even outside the exhibition as they walk towards the museum.

Target audience / community: students

Demonstrating innovation in: use of augmented reality
